

Find The Missing Place Value To Form A 5-Digit Number

Fill the appropriate numbers in the blanks so that the sum is equal to the 5-digit number given. We have done the first one for your reference

$$10000 + 1000 + 100 + 60 + \underline{\hspace{1cm}} = 11167$$

$$\underline{\hspace{1cm}} + 6000 + 100 + 60 + 7 = 16191$$

$$10000 + \underline{\hspace{1cm}} + 500 + 70 = 11574$$

$$50000 + \underline{\hspace{1cm}} + 700 + 0 + 9 = 58709$$

$$1000 + 800 + 70 + \underline{\hspace{1cm}} = 10709$$

$$20000 + \underline{\hspace{1cm}} + 400 + 20 + 3 = 27423$$

$$10000 + \underline{\hspace{1cm}} + 300 + \underline{\hspace{1cm}} + 3 = 15323$$

$$20000 + 5000 + \underline{\hspace{1cm}} + 70 + 0 = 25470$$

$$2000 + \underline{\hspace{1cm}} + 60 + 0 = 2260$$

$$\underline{\hspace{1cm}} + 0 + 100 + \underline{\hspace{1cm}} + 2 = 27102$$

$$30000 + \underline{\hspace{1cm}} + 700 + \underline{\hspace{1cm}} + 6 = 37756$$

$$\underline{\hspace{1cm}} + 8000 + \underline{\hspace{1cm}} + 0 + 2 = 28802$$

$$10000 + \underline{\hspace{1cm}} + 800 + \underline{\hspace{1cm}} + 2 = 10872$$

$$60000 + \underline{\hspace{1cm}} + 200 + \underline{\hspace{1cm}} + 0 = 63220$$

$$70000 + 3000 + \underline{\hspace{1cm}} + 0 + 0 = 73700$$
