

# Learning Divisions

Division is breaking a number up into equal parts.

**For example,**

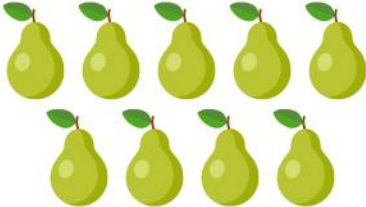

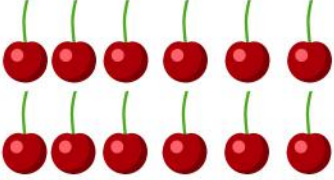

What is 30 divided by 6? If you take 30 things and put them in 6 equal-sized groups, there will be 5 things in each division.

So the answer to 30 divided by 6 is 5.

**Give answers to the following questions in the space provided. The first one is answered for your understanding.**

	$\underline{10} / \underline{2} = \underline{5}$	<p>How many bananas does each kid get? = <u>5</u> bananas.</p>
	$\underline{\quad} / \underline{\quad} = \underline{\quad}$	<p>How many strawberries does each kid get? = <u>        </u> strawberries</p>
	$\underline{\quad} / \underline{\quad} = \underline{\quad}$	<p>How many apples does each kid get? = <u>        </u> apples</p>

	$\underline{\quad} / \underline{\quad} = \underline{\quad}$	 How many pears does each kid get? = _____ pears
	$\underline{\quad} / \underline{\quad} = \underline{\quad}$	 How many cherries does each kid get? = _____ cherries
	$\underline{\quad} / \underline{\quad} = \underline{\quad}$	 How many blueberries does each kid get? = _____ blueberries
	$\underline{\quad} / \underline{\quad} = \underline{\quad}$	 How many coconuts does each kid get? = _____ coconuts
	$\underline{\quad} / \underline{\quad} = \underline{\quad}$	 How many peaches does each kid get? = _____ peaches
	$\underline{\quad} / \underline{\quad} = \underline{\quad}$	 How many pomegranates does each kid get? = _____ pomegranates
	$\underline{\quad} / \underline{\quad} = \underline{\quad}$	 How many peaches does each kid get? = _____ peaches
