

Learning The Table Of Number 11

Write the correct answers in the following table.

$11 \times 1 = 11$

$11 \times 2 = \underline{\hspace{2cm}}$

$11 \times 3 = \underline{\hspace{2cm}}$

$11 \times 4 = \underline{\hspace{2cm}}$

$11 \times 5 = \underline{\hspace{2cm}}$

$11 \times 6 = \underline{\hspace{2cm}}$

$11 \times 7 = \underline{\hspace{2cm}}$

$11 \times 8 = \underline{\hspace{2cm}}$

$11 \times 9 = \underline{\hspace{2cm}}$

$11 \times 10 = \underline{\hspace{2cm}}$

$11 \times 11 = \underline{\hspace{2cm}}$

$11 \times 12 = \underline{\hspace{2cm}}$

Write the correct number in the empty spaces to complete the equation. The first one is solved as an example.

1. $\underline{\hspace{1cm}} \times 11 = 66$

6. $11 \times \underline{\hspace{1cm}} = 121$

2. $11 \times \underline{\hspace{1cm}} = 55$

7. $11 \times \underline{\hspace{1cm}} = 132$

3. $11 \times \underline{\hspace{1cm}} = 88$

8. $11 \times \underline{\hspace{1cm}} = 0$

4. $\underline{\hspace{1cm}} \times 11 = 99$

9. $\underline{\hspace{1cm}} \times 11 = 33$

5. $11 \times \underline{\hspace{1cm}} = 77$

10. $11 \times \underline{\hspace{1cm}} = 110$
