

# Decoding The Roman Numbers

In the following table, write the numbers represented by the Roman numerals in the provided space. The first one is solved as an example for you.

IX	=	<u>9</u>	XXXV	=	<u>          </u>
XI	=	<u>          </u>	LXXXIX	=	<u>          </u>
LXXVII	=	<u>          </u>	XIX	=	<u>          </u>
V	=	<u>          </u>	LVI	=	<u>          </u>
XXII	=	<u>          </u>	XCIX	=	<u>          </u>
LXIV	=	<u>          </u>	XXXVIII	=	<u>          </u>
XLVI	=	<u>          </u>	LX	=	<u>          </u>
XXXII	=	<u>          </u>	XLI	=	<u>          </u>
C	=	<u>          </u>	LXXX	=	<u>          </u>
XLIV	=	<u>          </u>	XXV	=	<u>          </u>
LXXIV	=	<u>          </u>	LXXXI	=	<u>          </u>
LII	=	<u>          </u>	VI	=	<u>          </u>
LXXI	=	<u>          </u>	XCIV	=	<u>          </u>
XXVIII	=	<u>          </u>	LIX	=	<u>          </u>
LXXXVI	=	<u>          </u>	LXVIII	=	<u>          </u>
