

# Factors To Consider When Buying A Toy For \_\_\_\_\_ 3-Year-Old Boys

Consider toys that stimulate creativity and promote cognitive, motor, and social skills.

Opt for multi-function toys, as such toys keep children engrossed.

Select toys free from sharp edges and big enough not to pose a choking risk.

Pick toys that are a combination of educational and entertaining.

Look for toys recommended for their age, as toys crafted for older children may be challenging to play with.

Toys that are brightly colored may appeal more to your child while keeping them occupied.
