

TOILET TYPES AND Styles For Small Bathrooms

Types

Wall-hung

The toilet is hung on the wall at a desired height without needing a pedestal.

Close coupled

The most popular modern toilets with a connected cistern and pan.

Back to walls

The toilet is fixed to the floor and is ideal for saving space.

Styles

Low level

The cistern is fitted low to the wall, making the flush pipe shorter.

High level

Ideal for traditional bathrooms with the cistern placed high above the pan.

Comfort raised

Suitable for those with back or knee pain problems, the toilet seat sits higher than the standard toilet pan.
