

THE RIGHT WAY TO CUT CHILD NAILS

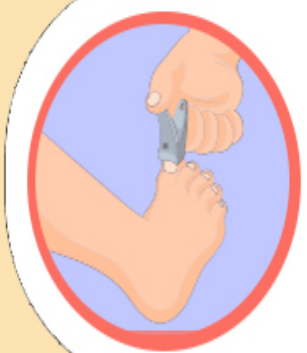

TO PREVENT INGROWN NAILS

Wet your child's nails if they seem too hard

Gently clip the excess nail growing beyond the natural curve of the nail bed

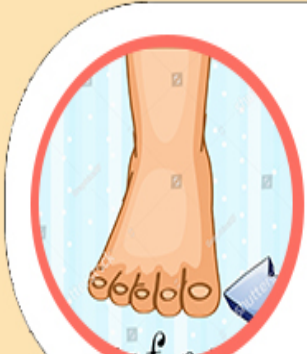

Do not cut the nails too close to the nail bed

Cut the nails from the sides and eventually move towards the center

Keep the shape of the nails straight on top and not too deep to reduce the chances of ingrown nails

After cutting the nails, file them gently, if needed
