

SIDE EFFECTS OF OMEPRAZOLE

AND EFFECTS OF PROLONGED USE DURING PREGNANCY

Side Effects

Headache

Stomach pain

Nausea

Diarrhea

Flatulence

Effects Of Prolonged Use

Excessive suppression of acid secretion (hypochlorhydria)

Hypochlorhydria may increase the risk of intestinal, respiratory, and urinary tract infections

Note

Make sure you follow the dosage and duration of taking omeprazole as instructed by the doctor to minimize side effects and avoid severe harmful effects.
