

Incredible Facts About **CHEETAH** To Share With Children

Cheetahs have long black stripes on their face and much rounder spots than leopards.

Cheetahs cannot climb trees.

Female cheetahs live alone if not caring for their cubs, while male cheetahs form a 'coalition' to hunt together.

They typically consume water only once every three to four days.

Unlike other wild cats, cheetahs are not picky about their habitats.

They are the fastest creature on land and can reach 70 mph in just three seconds.

Their extremely clear vision makes them spot their prey from as far as 5 km.

They don't roar but make small chirping sounds to communicate.
