

## OTHER HOMEMADE PREGNANCY TESTS

### Shampoo pregnancy test

- Add two drops of shampoo (preferably colorless) to water in a bowl and mix gently.
- Add urine and observe. Bubbling or frothing in the mixture shows positive results.

### Wheat pregnancy test

- Take urine in a bowl and add a few wheat seeds to it.
- If they germinate within a couple of days, it is said to indicate a positive result.

### Mustard powder pregnancy test

- Take 3/4 cup of mustard powder in warm bathtub water and take a soak for about 20 minutes.
- If you do not get your periods after it, you may be pregnant.

**Note:** Use your first urine in the morning for tests that require a urine sample. If you suspect you are pregnant, consult a doctor.
