## What Makes A Good Child Model

Good features such as healthy skin, big and bright eyes, shiny hair, and a smiling face.

A "different" or unusual look might make your child unique.

A fearless, happy and smiling child is preferred to one who always needs their parents around.

The child needs to be friendly, outgoing, and comfortable interacting with strangers as they have to meet photographers and baby wranglers.

The child should be good at taking advice and instructions from new people during shoots.
