

# Types Of *Air Fresheners* For A Fresh-Smelling Bathroom

## Aerosol sprays

- Come in pressurized cans
- Provide quick solutions to mask unwanted odors

## Pump sprays

- Come in spray bottles attached to pipe
- Contain odor-dissolving chemicals to eliminate the odor or block them from dispersing

## Gel-based air fresheners

- Are placed in containers with a small opening
- Evenly spread the fragrance throughout the bathroom for odor relief

## Plug-in air fresheners

- Come in an electric dispenser with a cartridge, diffusing fragrance continuously
- Provide quick and steady fragrance

## Scented candles and wax melts

- Need to be lit up to diffuse the scent
- Cover the odors for a short term

## Potpourri

- Contain dried petals and spices placed in a bottle, bag, or bowl
- Are environment-friendly, made of 100% natural ingredients
