

Indoor And Outdoor Ball Games

Segregate The Balls

Fill an inflatable pool with different colored balls and let the children dive in to segregate them into their respective colors. This is a fun way to learn colors.

Juggling

Challenge them to juggle three or four balls without dropping them for a few seconds. This can help improve their focus and concentration.

Break The Pyramid

Arrange a few tin cans or plastic cups on top of one another to form a pyramid. They need to hit it with a ball, so the structure collapses, and if the cups don't fall all at once, they need to try again.

Pool Ball Race

Have some summer fun with this game where the kids need to race a ball across the pool without throwing it but by pushing it while swimming.

Run The Ball Through A Maze

Make a DIY maze with things at home and keep it tricky enough for children to use their thinking skills to get to the escape.
