

Precautions -----For Using Tamiflu----- During Pregnancy

Tamiflu is not to be used as a substitute for the flu vaccine.

Take the medication along with food.

You must wait at least two weeks before taking Tamiflu if you have already received the nasal flu vaccination.

Pregnant women should get treated for flu as early as possible.

Inform your doctor about the history of any disease or illness before starting the medication.

Tamiflu may cause allergic reactions. Seek medical help if symptoms appear.
