

Ways To Regulate

The Water Temperature Of SWIMMING POOLS

Tips To Keep It Warm

Retain solar heat in the pool by covering it with solar blankets.

Install PVC-based winter pool covers to reduce heat loss.

Use vinyl-based UV-resistant solar rings for smaller pools.

Prevent heat loss from the water by using liquid solar covers.

Tips To Keep It Cool

Install a water fountain in the pool to keep the water moving and cool.

Shade the water from the sun by installing an awning over the pool.

Release heat into the cool air by running the pool pump at night for circulation.

Install a pool cooler for instant and faster cooling results.
