

Tips For Applying A Face Cream

Make sure to patch-test a new face cream to check for allergic reactions.

Wash your face and hands before applying the face cream to eliminate breakouts.

Use the face cream before applying the foundation or any makeup product.

Apply the face cream on damp skin for improved absorption and moisture retention.

Massage the face cream using small circular and upward motions till it gets absorbed.

Use your fingers to blend face cream effectively into the skin.

Avoid applying the face cream to very oily areas to prevent clogged pores.

Wait for the face cream to dry well before proceeding with your makeup.
