

Tips To Follow

When Applying Eyelash Growth Serum

Ideally, apply the eyelash serum at night before bedtime.

Remove all your eye makeup before applying the growth serum.

Remove your contact lenses before applying the serum.

Remove excess serum from the applicator brush to ensure a thin layer.

Apply the serum as you would apply eyeliner to the base of the lash line.

Avoid applying it on the lower lash line unless advised by the manufacturer.

Gently wipe off any excess serum on the eyelashes or eyelids.
