

Steps For Applying Powder Foundation On Dry Skin

STEP 1

Cleanse your face properly using a facewash for dry skin.

STEP 2

Exfoliate your skin with a gentle chemical exfoliant rather than a scrub.

STEP 3

Apply moisturizers, face mists, or serum infused with hydrating agents.

STEP 4

Apply a hydrating primer for a smooth base for your foundation.

STEP 5

Instead of cream or liquid foundation, use tinted moisturizer, BB cream, or CC cream for dry skin.

STEP 6

Choose a dewy or satin finish powder foundation that matches your skin tone.

STEP 7

Pat the foundation in one direction using a beauty sponge or thick powder brush.

STEP 8

Complete your eye makeup and others before spritzing your face with a hydrating setting spray.
