

Steps For CAULKING A BATHTUB

STEP 01

Remove the caulk using a blade or scraper-like tool. Refrain from scratching the caulk or adjacent surface.

STEP 02

Scrub the caulk residue or dust using a soft rag.

STEP 03

Use bleach solution or denatured alcohol to remove the caulk dust and ensure the surface is dry.

STEP 04

Now, lay the painter's tape parallel on either side of the space where the caulk goes.

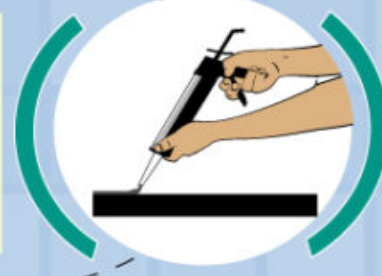

STEP 05

Load the caulking gun with the caulk tube and hold it at an angle.

STEP 06

Apply caulk to the seams by applying proper pressure.

STEP 07

Smooth the applied caulk using a lint-free rag or paper towel.

STEP 08

Finally, remove the painter's tape.
