

Points To Consider When Buying A Stroller Toy

Safety

Ensure non-toxic and BPA-free materials are used to make the toy.

Detachable pieces

Select a toy free of small detachable components to prevent choking.

Washable

Look for an easy-to-wash toy because babies often tend to put it in their mouths.

Attachment

Ensure the stroller toy attaches securely to the stroller.

Compatibility

Pick a toy that is compatible with the stroller handles.

Versatility

Consider a stroller toy that doubles as a car seat toy

Durability

Go for a toy that is made of high-quality materials for a better shelf-life.

Additional features

A toy that squeaks or with baby-safe mirrors can entertain the baby for longer.
