

Things To Consider When Buying Baby Diapers

Absorbency

Diapers with adequate absorbency can hold the contents for longer.

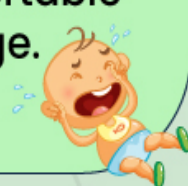

Wetness indicator

Reminds you to change the diaper when it is soiled.

Size

A well-fitted diaper will keep your little one comfortable and prevents leakage.

Breathability

Ensure the diaper is made from soft and breathable material to avoid rashes or irritation.

Stretchability

Diapers that stretch well stay in place and do not fall off when filled.

Diaper type

Choose between bamboo, disposable, or cloth-type diapers.
