

# Tips For Cleaning Children's Magnetic Blocks Toy

Wipe the blocks clean with a wet cloth dipped in soapy water.

Use a soft towel to wipe any excess water and dry the pieces completely.

If using disinfecting wipes for cleaning, let the pieces air dry.

Do not use harsh cleaners, as they can corrode the paint coat or plastic overtime.

Do not soak the blocks in or under running water, as they are not waterproof.

Make sure to dry the pieces properly to avoid moldy growths and mildews.

Once cleaned, let them remain untouched for about 72 hours before reusing.

If the water gets inside the block, sit them up parallel to the wall and let gravity pull out the water from the sides.
