Tips For Cleaning Sunglasses

Wash your hands to remove dirt and hand creams before cleaning your sunglasses.

Wash sunglasses under running plain warm water for a deep cleanse. Do not use household cleaning solvents to clean the sunglasses.

Use a fine microfiber cloth for lenses and a lens-cleaning solution to gently clean the lenses after they are dry. Never use tissues or clothes to clean lenses.

If the lenses are not too dirty, clean them with a fine microfiber cloth and a drop of water for each lens without washing the sunglasses.

Use a separate microfiber cloth to clean the frame of the sunglasses. Damp the cloth with mild soapy water to remove oils and stains.

Air dry the sunglasses thoroughly before storing them in their case.
