

# Steps For Cleaning

## Water Or Aqua Shoes

### Step 1

Remove the insoles from the shoes.

### Step 2

Rinse the insoles and shoes separately with plain water.

### Step 3

Mix bleach-free detergent and water not beyond 30°C in the sink or tub.

### Step 4

Add some baking soda to the solution to eliminate odor.

### Step 5

Soak the insoles and shoes in the solution for 15 minutes.

15 mins

### Step 6

Gently hand wash the insoles and shoes with a sponge.

### Step 7

Rinse the shoes and insoles with clean water to remove soap residue.

### Step 8

Air-dry the shoes and insoles separately away from direct sunlight.

### Step 9

Insert the insoles back into the shoe after thoroughly drying them.
