

# STEPS FOR CLEANING

## Zoodle Makers

Switch off and unplug the device if it is an electric one.

Separate the removable parts, including the blades, tray, sliding board, and handle.

Rinse these parts, except the electrical components and spiralizer body, under warm water to remove loose stuff.

Soak them in warm, soapy water if there are any tough stains.

Scrub carefully with a soft nylon brush to remove any stuck food particles.

Rinse off the soapy water thoroughly from all parts and place them on a towel for air drying; be careful when handling blades.

Clean the spiralizer body and electrical components with a moist clean towel. Use a dry towel to wipe it dry.

Once every part is dried properly, reassemble all the parts carefully.
