

Steps For Installing Light Bulbs On Your Ceiling Fan

Step 1:

Cut off the power supply to the ceiling fan at the main switchboard.

Step 2:

Remove the decorative plate at the center of the fan.

Step 3:

Connect the fan's light box's wires with the light bulb's wire housing as per the instructions.

Step 4:

Use wire nuts and electrical tape to secure the connections.

Step 5:

Screw the light box back into the center plate of the ceiling fan.

Step 6:

Reattach the center plate to the fan.

Step 7:

Install the light bulbs as instructed by the manufacturer.

Step 8:

Restore the power to the ceiling fan and switch it on to check your work.
