

Tips for Maintaining *A Skateboard*

Use a dedicated storage bag for transporting the skateboard to prevent abrasions.

Check and tighten all the screws and bolts after every fourth or fifth use.

Regularly clean the skateboard with water and mild soap to remove dirt.

Rotate the wheels every two months for even wear across all wheels.

Clean the bearings every three months using alcohol-based solutions.

Lubricate the bearings with white mineral oil or Teflon-based oil after cleaning.

Replace the grip tape when it starts to peel off or tear.

Smooth out splintered edges of the board using sandpaper.

Avoid skateboarding on wet surfaces or during rain to prevent moisture damage.

Do not store the skateboard in areas exposed to direct sunlight to prevent warping.
