

# Relationship Tips For *Sagittarius* & *Gemini* Couples

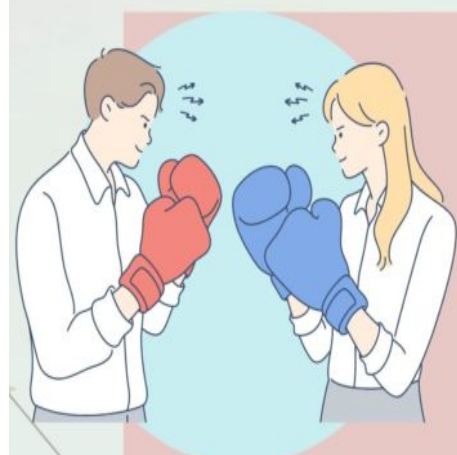

Given that both signs love a thrilling adventure, they may become too engrossed in their interests. So they must make time for each other and be involved in their hobbies or events.

Instead of being annoyed, Sagittarius may support Gemini in satiating their curiosity about the world.

On the other hand, Gemini may appreciate Sagittarius' philosophical ways while understanding their emotional expressions.

Since both tend to have a competitive nature, they need to understand not to compete with each other and let go of their egos.

The Gemini must learn to control their temper during arguments, while the Sagittarius can allow them to have some space to clear their head.
