

Tips To Make *Swimsuits* Last Long

Pretreat the swimming suit by washing it in a diluted vinegar solution.

Remove any chlorinated or sea water from the swimsuit once done swimming.

Wear the suit after the skin has absorbed sunscreen, oils, perfumes, or body lotion.

Wash the swimsuit in cold water and with a mild detergent.

Prefer hand-washing and air-drying the swimsuit.

Air-dry the suit in the shade on a flat surface to prevent creases and fading.

Avoid wringing the swimsuit to keep it from developing tears.

Hold back from ironing or using fabric softeners.
