

FACTORS TO CONSIDER WHEN BUYING A LAVA LAMP

TYPE

Lava lamps are available in classic and glitter types. The latter heats faster than a classic lava lamp.

SHAPE

Generally, classic lava lamps are available in a cone shape. Rectangular, bullet-shaped, globe, and circular are newer modern options.

COLOR

Some manufacturers add color to the wax or liquid inside the lamp, while others paint the lamp container. The latter may last only a short time but offer a vivid look.

ADDITIONAL FEATURES

Some lamps play music, and some rotate when turned on. You can consider features that you would prefer.

DURABILITY

Ensure you invest in a lava lamp made of sturdy material that is easy to maintain to improve its longevity.
