

Stepwise Method To Mix And Prepare

Plaster Of Paris For Craft

1. Use a measuring cup to add two portions of POP to every portion of water (in a ratio of 2:1) in a wide bowl.
2. Do not pour the powder in one place but sprinkle them evenly.

3. Tap the bowl to prevent air bubbles when adding the powder.
4. Continuously stir the mixture gently with a spatula or spoon to make fine consistency without lumps.
5. Add poster or acrylic paint for the color while mixing continuously.

6. Let the mixture settle for a few seconds before pouring into the mold.
7. Make sure to prepare the mixture only if you're using it immediately.
