

Steps To Scoop Hard Frozen Ice Cream With Ease

Step 1:

Place a sharp knife under running hot water for 30 seconds to warm it up.

Step 2:

Use the knife to make one-inch-deep vertical cuts one inch apart across the ice cream.

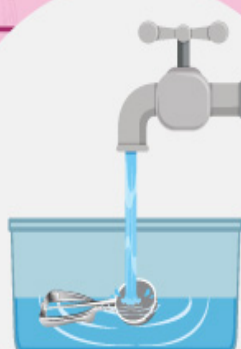

Step 3:

Make similar cuts across the ice cream horizontally, creating a checkerboard effect.

Step 4:

Heat the ice cream scoop under running hot water for 30 seconds.

Step 5:

Scoop the ice cream and quickly transfer it to your desired bowl.

Step 6:

Recreate the checkerboard pattern as you reach the deeper levels of the ice cream.
