

Steps To Use A Caulk Gun

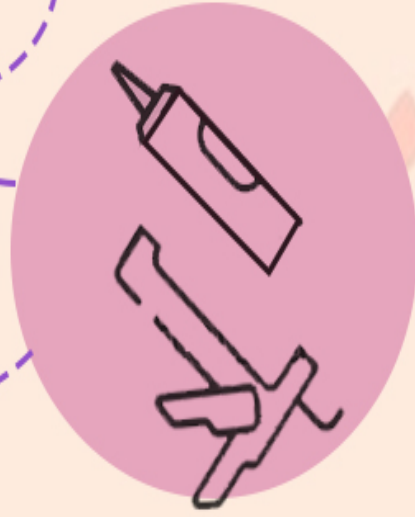

Step 1

Begin by removing any dirt and debris to create a smooth surface for caulking.

Step 2

Insert the caulking canister into the gun.

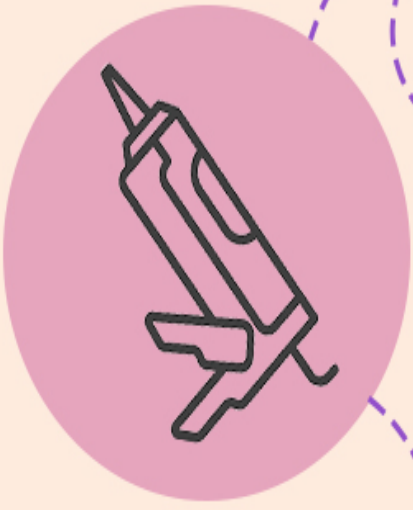

Step 3

Cut the tip of the caulking tube at the desired width.

Step 4

Practice or do a trial run to make straight lines with the caulking gun.

Step 5

Angle the caulking gun at 45 degrees to produce a steady stream of caulk.

Step 6

Smoothen the caulked surface with a tool or gloved fingers.
