

# Tips To Follow When Using Polymer Clay For Making Jewelry

Prep your workspace with parchment paper to minimize clay mess.

Prep your hands with a hand balm for smooth clay maneuvering.

Prep the clay by warming and kneading it with your hands until malleable.

Wash your hands before switching between different colored clays.

Prefer metal shape cutters for added precision over plastic ones.

Poke the hook holes into the clay jewelry before baking them in the oven.

Use an oven thermometer to monitor the oven's temperature accurately.

Store the leftover clay in individual ziplock plastic pouches away from sunlight.
