

Tips For Washing A Baby Bottle

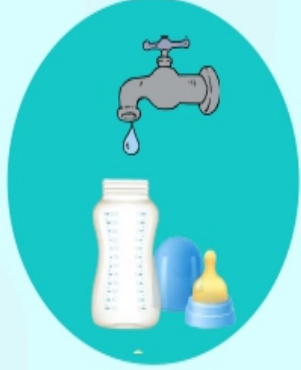

Step 1

Wash your hands with soap and water before cleaning the baby bottle.

Step 2

Separate all the detachable parts of the bottle before washing.

Step 3

Preclean each bottle part by rinsing them under running water.

Step 4

Clean the bottle parts thoroughly in a clean basin of hot water and soap.

Step 5

Use a bottle brush to clean the hard-to-reach portions of the bottle.

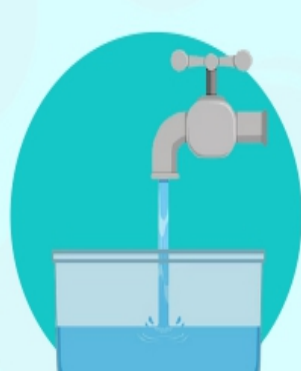

Step 6

Rinse each bottle part under running water to remove soap residue.

Step 7

Place the clean parts on an unused paper towel and let them air dry.

Step 8

Clean, rinse, and air dry the wash basin and bottle brush.
