

Stepwise Cleaning Method For Baby Bottles Using A Dish Soap

Wash your hands with soap or use a hand sanitizer before touching the bottles.

Discard the leftover content in the bottles and rinse with clean water.

Put all the bottles, caps, pacifiers, and other containers in a wash basin.

Add clean water and dish soap to it and let them soak.

Scrub all the items using a soft-bristled brush.

Pour and squeeze out soapy water from the items.

Rinse them all with clean and safe water thoroughly.

Let them air dry before storing them in a clean space until the next use.
