

## Steps Involved In Wearing Hair Extensions Properly

**Step 1:** Section your hair above your ears with a tail comb.

**Step 2:** Leave enough hair on top to help hide the extension clips later on.

**Step 3:** Secure all the hair of the upper segment at the crown of your head with a claw clip.

**Step 4:** Align a full-head extension at the base of the upper segment, from ear to ear.

**Step 5:** Gently attach the extension to your hair using its built-in clips.

**Step 6:** Attach the smaller extensions near the temples.

**Step 7:** Release the hair on top from the claw clip and use your hands to settle your mane.
