

Points To Consider When Using A Desk Lamp

Use heavy-weight lamps to avoid tip-overs if you have pets or children.

Place the lamp at an appropriate height to avoid hurting your eyes.

Pick a clamp-based lamp if your work area or table is small.

Avoid desk lamps that emit mercury to safeguard your health.

Adjust the lamp at an appropriate angle to avoid excessive shadows in the room.

Keep an eye on the bulbs and batteries and change them when they wear out.
