

Step-By-Step Guide For Replacing A *Toilet Wax Ring*

Step 1

Turn off the water supply to the toilet.

Step 2

Empty the water from the flush bowl.

Step 3

Detach the water supply pipeline from the toilet.

Step 4

Eliminate the caulking at the base with a knife.

Step 5

Remove the nuts and washers at the toilet's base.

Step 6

Gently wiggle the toilet back and forth to loosen the hold of the old wax ring.

Step 7

Carefully lift the toilet from the flange bolts and place it on the floor.

Step 8

Remove the old wax ring wrapped around the flange.

Step 9

Place the new toilet wax ring at the bottom of the drain or the top of the flange.

Step 10

Carefully place the toilet back and seal it to the floor.
