

Types Of —PILLOWS— For Sleep Apnea

CPAP Pillow

It provides shoulder support for side sleepers, and its slant design may help relieve respiratory obstructions.

Wedge Pillow

This gel-infused memory foam-based pillow best suits back sleepers as it elevates the upper body, which may reduce airway compression.

Contoured Side Sleeper Pillow

The ergonomic design provides maximum comfort to side sleepers, which may improve neck and shoulder alignment.

Adjustable Wedge Pillow

You can adjust this pillow to various heights by removing or adding layers of foam as per your comfort.

Cervical Pillow

Primarily designed for back sleepers, this pillow can help relieve pressure on the neck.

Foam Pillow

The pillow conforms to your body's contour even as you change your sleeping position.
