

# Monopoly Game

## Instructions To Keep In Mind

Read the game manual carefully for setting up the board and playing.

Decide the time limit beforehand to avoid playing for hours.

Start with three or four players and ensure they are available throughout the game.

Have an extra person act as a banker to handle all the excess money.

Make sure each player has been provided money by the banker.

Carefully read and follow the instructions when your game piece is in a specific space after rolling the dice.

If the space indicates the ability to buy a product, it is your choice whether you want to buy it or not.

You have to pay rent when your game piece goes to anyone else's property.
