

# Common Causes And Preventive Methods For Swollen Baby Eyes

## Causes of eye swelling and their indications

### Insect bites

Swelling may be pinkish and large

### Allergic reactions

Swelling along with itching and wateriness

### Foreign body

Irritation in the eye along with swelling and wateriness

### Eyelid infections

Swollen, tender, and painful eyes and eyelids

## Ways to prevent eye swelling

- Keep your baby's eyes clean, including their eyelashes and eyelids
- Maintain good hand hygiene, and trim your baby's nails as they grow
- Avoid dusting or cleaning the room in your baby's presence
- Monitor your baby when eating to prevent food from entering their eye
