

Safety Tips For **Painting** Your Child's Face

Use cosmetic-grade paints that have been approved as child-safe by FDA.

Check the ingredients label for potential allergens.

Do a patch test on the inside of the child's elbow before use.

Sanitize brushes and tools with hot soapy water before using them to apply face paint.

Do not paint on wounded skin.

Choose cosmetic glitter to avoid metallic allergies.

Do not paint around the eyes and mouth.

Do not paint the face of children younger than three years.
