

ARIES

GEMINI

Positives And Negatives of Aries-Gemini Pairing

Positives

Both Aries and Gemini love exploring new ideas.

These two signs greatly value independence and detest being controlled.

Aries is impressed by Gemini's conversation skills and intellect, while Gemini is awed by Aries' strong decision-making ability.

While Aries is a passionate sign with an extremely short fuse, the considerate Gemini can handle Aries' notorious temper without getting offended easily.

The outgoing and outspoken nature of both the signs, along with their creative side, make for many long scintillating conversations.

Negatives

Overthinking makes Gemini indecisive. They take a lot of time to decide, even on the simplest things. This may frustrate Aries.

Gemini has a split personality. When they team up with the reckless Aries, their similar nature can create chaos.

These signs get bored quickly, so while they begin many new things together, their enthusiasm can wane at the drop of a hat.

Geminis are flirtatious and charming, sometimes indulging in harmless flirting. Possessive Aries will find this behavior hard to digest.

Gemini may be flexible, but they greatly value their freedom. They would not tolerate any kind of bullying by Aries.
