

INTERESTING FACTS ABOUT

Modes Of

— TRANSPORTATION —

Children can spot different transportation modes as soon as they step on the road. So learning some interesting facts could be exciting for them.

Walking was the first mode of transportation.

The first use of wheels was documented around 3,500 BC to make clay.

There were over 220 million cars in the US in 2000, more than one for every person over 18 years of age.

White is the most popular car color in the world.

The world's first car was a three-wheeler, patented in 1886.

There are now three major modes of transportation — land, air, and water.
