

# Benefits of and tips for a — baby sleeping on floor —

## Advantages

You will save space that large baby cribs would otherwise occupy.

You may decorate your baby's sleeping space/room as elaborately as possible.

Your baby might learn to crawl and explore things faster, helping them develop gross motor skills better.

You could be free from the task of transitioning your baby from a crib to a bed.

## Tips

Check for any cracks or holes in the flooring from where potential pests and insects may enter.

Place all furniture away from the baby's sleeping place.

Place potentially dangerous items away from the baby to prevent the baby from crawling and reaching them.
