

White Chunks In Baby Poop:

What's Normal And What Is Not

Usual Symptoms

- Stool containing curdled milk
- Light yellow-colored stools
- Grayish or white-colored stools

Unusual Symptoms

If your infant passes white stool constantly and has any of these symptoms, it is ideal to see a doctor.

- Abdominal pain and discomfort
- Vomiting, diarrhea, or bloody stools
- Passing stools that are pale or clay-colored
- Poop accompanied by large quantities of mucus
- Symptoms resembling lactose intolerance
