

Notable Points To Remember When Taking Nyquil During Pregnancy

Image: Shutterstock

- Do not exceed four doses of this medication in 24 hours.
- It is better to take it after meals or snacks to reduce the side effects.

- Use alcohol-free versions.
- The medication may cause some drowsiness. Avoid doing activities that need attention, such as driving.

- Be observant of any allergic reactions.
- As Nyquil contains acetaminophen, use it with caution if you have a preexisting liver disorder.
