

Tips To Follow When Applying Perfume

Apply it on the body as well as on the clothes for a long-lasting effect.

Using the perfume after a shower is ideal, as the skin pores are open.

Moisturized skin holds the perfume better than dry skin.

Applying perfume on the pulse points can make it last longer.

Avoid rubbing or dabbing the skin once the perfume is applied.

The perfume on the wrists would require reapplication when you wash or sanitize your hands.

Avoid using perfumes that have been in use for 12 months.

Don't keep your perfumes in washrooms to prevent humidity and heat from altering the quality.

When using the fragrance on your hair, spray it on your hairbrush and run it through your hair.
