

Points To Remember When Using Bath Toys

Avoid giving toys with detachable parts to children younger than three years.

Ensure the battery-operated bath toy's rubber seal is intact to avoid burns.

Thoroughly wash and dry the toys after every use to prevent mildew.

Regularly clean and remove water stuck in squirting toys to prevent mold buildup.

Throw away any bath toys that have developed mold.

Avoid putting the bath toys in hot water to prevent disfiguration and breakdown of their colors.
